

# SORTING ROOM USER INSTRUCTIONS

**EFFECTIVE RECYCLING** starts with sorting at home. This is why we recommend taking the waste types collected using the pipeline-based system into consideration at their source and planning waste sorting at home in a way that suits you. The pipeline-based waste collection system is used to collect mixed waste, biowaste, cardboard, paper and plastic packaging. Other recyclable waste must be taken to a sorting room.

## GLASS

Glass bottles and jars

## METAL

Tins and beverage cans, aluminium tins and foils, metal covers and caps, metal tealight holders, empty and dry paint cans, empty aerosol cans (no sloshing or hissing) and small metal objects (hinges, screws, utensils)

## LARGE CARDBOARD ITEMS

Large cardboard and pizza boxes

Please note! **REMEMBER TO FLATTEN CARDBOARD BOXES, THANK YOU!**

## LARGE MIXED WASTE ITEMS

Rugs and carpets, hockey sticks, helmets, buckets, binders

### NO:

Porcelain and ceramics, glass used in windows, mirrors or cars, heat-resistant glass (casserole dishes, coffee pots, drinking glasses), opal glass (sometimes used in cosmetics packaging, for example), crystal, light bulbs

### NO:

Hazardous waste, such as batteries and paints cans containing paint, waste electrical and electronic equipment, large metal objects (such as bicycles, pots, pans), light bulbs

### NO:

Small cardboard waste collected using the pipeline-based system, such as liquid cartons (milk and juice cartons), cardboard packaging (cereal and biscuit packaging), egg cartons

### NO:

Hazardous waste, mattresses, furniture, home appliances

Please note! **NO SMALL MIXED WASTE BAGS COLLECTED USING THE PIPELINE-BASED SYSTEM**

## WASTE UNSUITABLE FOR BOTH THE PIPELINE-BASED SYSTEM AND SORTING ROOMS

---
